PROFESSIONAL SUMMARY

Frontend Engineer with **4.5+ years** building scalable, high-performance **React.js**, **TypeScript**, and **Next.js** applications across enterprise, airline, and AI-powered platforms. Proven impact in conversion optimization, **Core Web Vitals**, **API performance**, **accessibility**, reusable UI architecture, and **design systems**, including an 18% booking conversion lift, 90+ **Lighthouse** scores, and 35% reduction in duplicate API calls. Hands-on with **Docker**, **CI/CD (GitHub Actions, SonarQube)**, and cloud-based authentication, collaborating in **Agile/Scrum** cross-functional teams to ship **accessible**, production-grade web applications at scale.

TECHNICAL SKILLS

Frontend Development:	React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, React Hooks, React Router, Server-Side Rendering (SSR), Responsive Design
UI Architecture & Design Systems:	Component Architecture, Reusable Components, Design Systems, Storybook, Tailwind CSS, ShadCN UI, Material UI, Micro Frontends
State & API Management:	TanStack Query, Redux Toolkit, Context API, REST APIs, API Integration, React Hook Form, Zod
Performance & Optimization:	Core Web Vitals (LCP, CLS, INP), Lighthouse, Code Splitting, Lazy Loading, Memoization, Image Optimization
Accessibility:	WCAG 2.0/2.1, Semantic HTML, ARIA, Screen Reader Testing (NVDA & VoiceOver)
DevOps & Tooling:	Git, GitHub Actions, CI/CD, Docker, npm Workspaces, Webpack, NGINX, Vite
Testing & Quality:	Jest, React Testing Library (RTL), Unit Testing, Accessibility Testing
Cloud & Identity:	Microsoft Entra ID, Azure AD, SSO, Authentication & Authorization
Engineering & Collaboration:	Agile/Scrum, Jira, Code Reviews, Technical Documentation, Stakeholder Communication, Cross-functional Collaboration, Problem Solving, Ownership, Mentoring

WORK EXPERIENCE

Publicis Sapient

Senior Experience Engineer	September 2025 - Present
- Improved booking conversion rate by 18% for P&O Cruises and Cunard through A/B experimentation and personalization features built with Next.js. - Enabled 10+ controlled feature rollouts across Booking, CDP, and Shorex modules by integrating Adobe Target feature flags into AEM for environment-specific toggling, including production. - Improved release quality by integrating SonarQube quality gates into GitHub Actions CI/CD pipelines, maintaining 80%+ test coverage across micro-frontend modules. - Collaborated with Design, QA, and Product teams in Agile/Scrum environments to deliver accessible, production-ready web applications.	

Morgan Stanley (Fixed-Term Contract, via Russell Tobin)

Senior Application Development Engineer	May 2025 - September 2025
- Owned end-to-end delivery of a scalable Tech Events platform built from scratch using React, TypeScript, ShadCN UI, designed to support 100+ concurrent events. - Achieved 90+ Lighthouse performance score by implementing route-based lazy loading, code splitting, and caching strategies to improve Core Web Vitals. - Reduced duplicate REST API calls by 35% using TanStack Query caching and memoization. - Implemented secure event management with role-based access control (RBAC), protected routes, React Hook Form, and Zod for 20+ field multi-step forms. - Partnered directly with business stakeholders to translate event-management requirements into technical scope, ensuring on-time delivery within the contract window.	

Unisys India Private Limited

Application Development Engineer

June 2023 - April 2025

- Engineered real-time airline retailing workflows end-to-end for the **Iberia Airline** Order View RS platform, built using **React**, **TypeScript**, and **REST APIs**, aligned with **IATA NDC v21.3.4**.
- Scaled the **Digital Engineer AI chat** platform to 1,000+ daily messages using **Next.js** and **Vercel AI SDK**, integrating **Microsoft Entra ID SSO** and **Docker containerization**.
- Built and published the **Unisys Component Library** (Unisys Design System) – 75+ **WCAG-compliant** web components as versioned **NPM packages**, achieving 85-100% test coverage.
- Mentored junior engineers on **React architecture** and reusable component design, and frontend development practices.

Harlalka Services India Private Limited (Client: VMware)

Frontend Developer

October 2021 - June 2023

- Developed reusable, production-grade UI components for the Publisher module of **VMware CSP Marketplace** using React.js, HTML5, CSS3 and Sass, with emphasis on performance, scalability, and maintainability.
- Contributed to the VMware **Clarity Design System** by documenting 25+ reusable UI patterns in **Storybook** to improve consistency and accelerate feature development.
- Modernized 3 legacy class-based React components into functional components using **React Hooks** and modular component patterns.
- Raised **WCAG 2.0** compliance from 50% to 80% by resolving 100+ accessibility issues, using **semantic HTML**, **ARIA**, and screen reader testing with **NVDA** (Windows) and **VoiceOver** (macOS).

PROJECTS

Chatuuu – AI Chat Application

chatuuu-ai.vercel.app

- Built a real-time AI chat application using **Next.js App Router**, **TypeScript**, and **Gemini 2.5 Flash**, supporting streaming responses and file/image attachments.
- Designed modular conversational interfaces using **ShadCN UI** and **Vercel AI Elements (AI SDK v5)**, achieving a **99 Lighthouse** score with a 92KB bundle through code splitting, lazy loading, and image optimization.

Prompt Stack

prompt-stack-ai.vercel.app

- Created a full-stack AI prompt management platform using **Next.js 16 (SSR)**, **React 19**, **TypeScript**, **MongoDB**, and **Mongoose**, enabling users to create, organize, and reuse prompt templates.
- Designed an interactive AI Playground integrating **Gemini** and **Groq APIs** for real-time prompt execution, with usage analytics.

EDUCATION

T John Institute of Technology

Bachelor of Engineering – Computer Science | 2016 - 2020
